[Official Brochure](#)

SOLUTION SNAPSHOT

RECOGNITION ACCURACY > 99.5% across 70+ countries	CAPTURE SPEED Up to 250 km/h	SEARCH SPEED < 1 s across 10M+ records
CAMERA INTEGRATION Native + ONVIF 3rd-party	DASHBOARD Web + iOS + Android	

Built for Real Operations

01

End-to-end license plate recognition platform for tolling, enforcement, and secure site entry.

APPLICATIONS

Where This Product Fits

03

Automated Tolling

Powers free-flow tolling lanes with real-time plate capture, account lookup, and billing API integration.

Traffic Law Enforcement

Cross-references plates against stolen vehicle, outstanding warrant, and registration databases to generate automatic enforcement actions.

Secure Access & Parking Management

Manages allowlist-based vehicle access at residential compounds, corporate campuses, and multi-storey car parks without human intervention.

SPECIFICATION

Technical Details

05

Recognition Accuracy	> 99.5% across 70+ countries
Capture Speed	Up to 250 km/h
Search Speed	< 1 s across 10M+ records
Camera Integration	Native + ONVIF 3rd-party
Dashboard	Web + iOS + Android
Alert Channels	SMS / email / webhook / barrier relay
Data Retention	Configurable, up to 10 years
API	REST + SOAP for legacy integration
Uptime SLA	99.9% cloud hosted
Warranty	Hardware 3 yr + annual software SLA

"From contract signature to live tolling operation took 11 days. The API integration with our billing back-end was straightforward and well-documented."

CTO, National Toll Authority

450-km highway network

RESOURCES

Media & Questions

Q. Can it read plates in multiple scripts (Arabic, Latin, etc.)?

A. Yes. The OCR engine supports Latin, Arabic, Cyrillic, and other scripts simultaneously. Multi-script country packs are updated quarterly.

Q. What is the maximum number of cameras supported?

A. The cloud platform scales horizontally to support thousands of camera endpoints. Contact our team for large-scale deployment architecture guidance.

Q. How are allowlists and blocklists managed?

A. Lists can be managed manually via the dashboard, imported in bulk from CSV, or updated automatically via the REST API from your existing database.
